## COMING IN FEBRUARY

# Latin America

THE DEATH OF FIDEL CASTRO in November came long after he had faded from the political stage. The regime he leaves behind is a creaking and repressive relic of Cold War communism. Yet for many Cubans and fellow travelers throughout the hemisphere, *Fidelismo* still symbolizes a glorious struggle for egalitarian revolutionary ideals and resistance against US imperialism. Unfortunately, a latter-day attempt to emulate that legacy has led Venezuela into chaos. Elsewhere in Latin America, while political and economic inequalities remain pervasive, reform of democratic institutions is increasingly seen as a more effective response than armed revolt. *Current History's* February issue will cover these and other developments and trends across the region. Topics scheduled to appear include:

- **Venezuela's Collapse**  
Michael McCarthy, American University
- **An Unpopular Peace in Colombia?**  
Eduardo Posada-Carbó, University of Oxford
- **Labor and Inequality in Latin America**  
Matthew Carnes, Georgetown University  
*Fifth in a series on labor relations around the world.*
- **Demands for Participatory Democracy in Chile**  
Jennifer Pribble, University of Richmond
- **The Mixed Results of Bolivia's Indigenous Politics**  
John Crabtree, University of Oxford
- **Haiti and the NGOs**  
Mark Schuller, Northern Illinois University
- **Central America's Epidemic of Violence**  
Sonja Wolf, Center for Research and Teaching in Economics, Mexico

## CONTENTS

- 3 **From Scarcity to Abundance:  
The New Geopolitics of Energy** ..... *Michael T. Klare*  
Surging production and cheaper renewable energy have upended assumptions that the world will soon run out of fossil fuels, which shaped international relations for decades.
- 10 **The Tragedy of Obama's Foreign Policy** ..... *Michael J. Boyle*  
President Obama envisioned a new US role in the world, relying less on military force, but wound up waging war in the shadows while ineffectively countering challenges to the liberal order.
- 17 **Labor Rights in the Age of Global Supply Chains** ..... *Layna Mosley*  
The benefits of trade belie much recent rhetoric—but there are ways to improve conditions for workers in both wealthy and developing nations. *Fourth in a series on labor relations around the world.*
- 24 **The Populist Turn in American Politics.** ..... *Barry Eichengreen*  
Popular revolts and demagogues fueled by a sense of helplessness in the face of powerful international forces are nothing new. History shows how they have been quelled in the past.
- 31 **The Nationalist Origins of Political Islam** ..... *Jocelyne Cesari*  
Islam became a source of collective identity and political mobilization in the era when modern nation-states emerged following the collapse of the Ottoman Empire.

### PERSPECTIVE

- 35 **Why Humanitarian Intervention Still Isn't a Global Norm** ..... *Rajan Menon*  
Efforts to press the international community to supersede national sovereignty when necessary to stop atrocities have been hindered by inconsistent application of the principle.

### BOOKS

- 38 **Visions of a Borderless World** ..... *Nando Sigona*  
Donald Trump vows to build a wall while Europe tries to pull up the drawbridge. A new book argues that borders violently enforce inequality, barring the global poor from prosperity.

### THE MONTH IN REVIEW

- 40 **November 2016**  
An international chronology of events in November, country by country, day by day.
